## HANDGUN SECTION

---

### Handgun Section Members,

Our 3 ranges are to open with restrictions on May 20, 2020. Below is a description of the restrictions and a guide for range use considering the new operating procedures.

- All members are required to sanitize hands prior to entry with the provided sanitizer. Use of gloves does not eliminate that requirement.
- Members are required to sign into, and out of, each range they use on every visit
- Members are to refrain from smoking within any Handgun Range
- No beverage containers are to be brought into any Handgun Range, members are asked to make efforts to take their garbage with them as well.
- Due to restricted availability of ports, members are encouraged to use and evacuate the range in a prompt fashion..and exercise a 2m social distancing practice.

### 12/25 Range

- Common use items like staplers will not be provided. Targets are available and free of charge.
- Every other port will be open, the use of closed ports is prohibited. One member per port, minors excepted.

### Steel Range and Action Range

- One member per table, minors excepted.
- Steel targets to be reset after use
- The Action office is closed and off limits
- As a matter of etiquette, it is considered proper to paint targets after use for the next shooter. Paint is not supplied by the Section.

- Action range use to continue as normal, with members practising safe distancing when sharing the Safety Table and other tables
- Garbage is to placed only in the barrels clearly marked 'Garbage'
- No targets are to be disposed of in any barrels, particularly those marked 'No Targets'
- Courses and matches are suspended until further notice

Your cooperation is appreciated. Volunteer activities and maintenance are also required and expected to continue.

Jeff Small

Handgun Section Director
